Tutorial Class:  Wed 6:00-7:00pm –Rich 104  
Teaching Assistant: Jasmine (Jiaming) Xu.  
Email: jiaming.xu@emory.edu

Office hours:  Tu Th 4:00-5:15 PM (or by appointment)  
Office:  Room 575, Psychology Bldg.

Course Description and Objectives

The topics we cover in this intermediate course in macroeconomics will help you understand how economies function, both in the national and international contexts. We will also discuss current economic issues, and you will critically evaluate articles in the financial press. We will focus on the fundamental issues of macroeconomics, such as inflation, unemployment, monetary and fiscal policy, short run fluctuations of the economy, savings and investment in the open economy, financial markets, and exchange rates. We will use macroeconomic tools to analyze how fiscal and monetary policies react to shocks affecting the economy. Finally, I will provide an introduction to the major schools of economic thought and their different approaches to same economic issues.

Prerequisite

It was listed on OPUS that this course required ECON 101 or BUS 201 and ECON 112 and MATH 111 or MATH or equivalent transfer credit as a prerequisite. It is your exclusive responsibility to check whether you satisfy the enrollment requirements to take this course.
General Outline of the Class

The format of the class: it will be mostly lectures, but I will also review problem sets or exams on a regular basis. We will also watch and discuss videos and press articles. You’re most welcome (and encouraged) to make remarks or to ask questions during class. Do not hesitate to interrupt me if you do not understand me or are confused by something I said. You are going to have a weekly class tutorial with the Teaching Assistant. You can also ask me questions during office hours, or by email. Remember that email is only suitable for very precise questions that can be answered in one or two sentences. However, it is ineffective when the questions are more general and require some elaboration. Therefore, I strongly encourage you to attend the tutorial classes or visit me during office hours. Ask for help as soon as you fall behind, and not just before the exams.

Textbook and Useful Resources:

The following textbook is required: Macroeconomics, by N. Gregory Mankiw, 8th edition, Worth publishers. This book is available in online e-commerce retailers. Do NOT buy the latest (9th) edition in the bookstore.

I will also use Mankiw’s 8th edition Solutions Manual (by Nora Underwood). Unfortunately, you cannot find this book online. However, I left a copy in the library that you can consult at any time.

Class Etiquette:

- Class attendance is not mandatory.
  - I will not take class attendance.
  - I will not give you extra credit for class attendance.
  - You should not let me know in advance if you are planning to skip classes.

- Notice, however, that it will be highly beneficial for you to attend classes.

We will discuss many of the exam questions in class. If you miss a class, it is up to you to make sure that you get the class notes (as well as any missed handout not posted in blackboard) directly from your classmates. Do not use the
office hours to recollect any lecture materials from missed classes. You will review the textbook’s problem sets in the weekly class tutorials. You do not need to attend this class if you feel you can grasp the material well.

- **Do not use laptops (or anything similar) in class.**

This is highly distractive and greatly disturb the class dynamics. I will request you to leave the classroom if you choose to use any electronic device.

- **Turn your cellular phones off (silent mode) before entering the class.**

**Course Webpage**

Announcements, problem sets and most of my class slides will be posted on Emory Canvas. Therefore, you should check Canvas frequently for updates. Make sure that you only use the email address provided above to contact me.

**Course Grading**

Exam #1: 20%
Exam #2: 30%
Exam #3: 50%

**Homework:** There will be three problem sets, which are ungraded. I may distribute some additional questions during my lectures. I encourage you to do the problem sets, because the questions in the exams are closely related to the problem sets. All this material will also be reviewed in the Tutorial Classes.

**Exams:** The exams are not cumulative, though some questions still require your knowledge of the chapters covered before the exam. The first two exams are scheduled on February 22 and March 29 respectively in the evening. Makeup midterm exams are not available. If you have a medical emergency, you will need to present a doctor’s note (subject to verification). In that case, I will distribute the weight of the missed exam equally between the two other exams. The final exam on May 8 6:30-9:00 PM should not be missed.

Your final letter grade depends on the following grading scale.
≥ 93%    A
90-92.9%   A-
87-89.9%   B+
83-86.9%   B
80-82.9%   B-
77-79.9%   C+
73-76.9%   C
70-72.9%   C-
67-69.9%   D+
60-66.9%   D
< 60%      F

If you would like to dispute your grade, I will be happy to regrade it. But I could not rule out the possibility that your new grade will be lower than the original grade.

**Honor code:** You are expected to adhere to the provisions of the Honor Code of Emory College. Suspected cases of academic misconduct will be handled in accordance to the Honor Code, which can be found at: [http://catalog.college.emory.edu/academic/policies-regulations/honor-code.html](http://catalog.college.emory.edu/academic/policies-regulations/honor-code.html)

**Students with disabilities:** Students with disabilities are encouraged to register with the Office of Disability Services (ODS). After that, you can come to see me and discuss accommodations and other special needs.

**ECON 212 EXAM STUDY TIPS**
- Review your notes regularly, attend tutorials and visit office hours
- Start preparing for the exam early.
- Learn as much as you can from the problem sets
- During exam, read questions carefully, spend time on understanding what’s being asked
- Try to enjoy this topic and try to relate it to your daily life.

**Course Outline**

Introduction (Chapter 2)
Press Articles: Labor Force Participation and Intangibles
National Income (Chapter 3)
Economic Growth (Chapter 8)
Unemployment (Chapter 7)
Press Articles:
Debate on Minimum Wages: Friedman and Krugman
Labor Market Polarization and the Future of Jobs
Exam #1 on Thursday, February 22
