FACULTY GUIDELINES

1. Admission to the GDBBS Training Faculty

Training faculty must be full-time, Emory (or Emory-affiliated) faculty, should have demonstrated expertise in the fields of training and must have, or have the prospect of acquiring, sufficient extramural funding to ensure support of the students' research projects. Examples of documented expertise include doctoral and/or postdoctoral training in the field, publications in major peer reviewed journals of the areas represented by the Program, and membership in professional society(s).

Application for membership to the training faculty in a GDBBS Program should be made to the Executive Committee of the Program. After review of the application and an assessment of past or anticipated participation of the candidate in graduate training, the committee will decide to decline or approve admission of the applicant. Often such consideration includes the presentation by the applicant of a publicly advertised research seminar to the Program faculty and students and a vote of the Program faculty by secret ballot. If the application is approved by the Executive Committee, a letter from the Program Director indicating the approval of the candidate by the Program is to be forwarded to the Division Director along with the rest of the application materials. The following items constitute a complete application:

- a current curriculum vitae
- an NIH PHS 398-style four page Biosketch
- indication of current, past and pending funding
- a letter from the candidate requesting admission and indicating his/her desire to become a training faculty member and willingness to participate in duties thereof
- a letter of support from the Departmental Chairperson
- information on past experience in training doctoral students or postdoctoral fellows (can be included in either the CV or the candidate’s letter)
- a list of planned or anticipated collaborative activities with Program faculty (can be included in either the CV or the candidate’s letter)
- a one page description of the candidate’s research
- a one sentence summary of his/her major research efforts suitable for use in the recruiting Viewbook
- the candidate’s Net ID
- the candidate’s EMPL ID
The candidate should explicitly indicate in which graduate level courses he/she has taught and/or in which specific courses he/she would volunteer to participate. According to Laney Graduate School guidelines, the application of new members must be forwarded to the Dean of the Laney Graduate School for approval.

2. Program Membership Limit

GDBBS faculty members are generally limited to membership in two Programs. Application for admission to a second Program requires only a letter from the Program Director on behalf of the Program Executive Committee requesting such an appointment and a letter from the faculty member detailing how they will contribute to the program, and an updated NIH Biosketch. In rare circumstances a Faculty Member may request appointment in more than two programs by submitting an updated NIH Biosketch, a letter from the candidate detailing how they will contribute to the Program and why a third program is appropriate, and supporting letters from all three Program Directors to the GDBBS Director. Such a request will only be approved if there is persuasive evidence that the Faculty Member will contribute in a significant way to the mission of all programs involved.

3. Level of Faculty Appointments

The three types of GDBBS membership are Full, Associate, and Adjunct Members. The definition of membership rights and responsibilities are as follows:

- **Full Member**: Full Members have full rights and privileges, including the right to act as Dissertation Advisors, to serve on any GDBBS Committee, or in an administrative position. Full Members must be faculty at Emory in good standing. To assure a stable training environment, faculty must have independent funding (i.e., as the sole PI) and sufficient research space must be assigned solely to the faculty member by their department. These should only include faculty who are already engaged in research, research funding, and scholarship (as first or last author). Exceptions can be made by the GDBBS Director, as appropriate. Programs may have restrictions on who can host a rotation student; please check with your Program DGS.

- **Associate Member**: Associate Members must be faculty at Emory. Associate Members have the rights and privileges of Full Members, except they may only serve as a Dissertation Co-Advisor, serve on dissertation committees, and may be involved in other aspects of the Graduate Program. Generally, this membership would be for financially dependent Research Track faculty or others who contribute to the mission of the Graduate Program but are not in a position to directly serve as mentor for new students in their research group, or those who have been judged to be non-participatory during the annual Program Review of Participation.
- **Adjunct Member:** Adjunct Members must be faculty or staff of another research institution and must have credentials similar to those of our Full Members. They will have all the rights and privileges of full members, except that they may only serve on University or GDBBS committees in an unofficial capacity and they may only serve as Dissertation Co-Advisors. (For example, for faculty at Georgia Tech and CDC.)

The application for membership will remain the same, except the rank of the proposed appointment must be specified in the letter from the Program Director. All listings of GDBBS faculty MUST contain the rank of appointment and a definition of these ranks. A Full Member must direct all Dissertations, even if the research is being done in the laboratory of an Associate or Adjunct member.

After consideration by the Program Executive Committee, the Program Director should forward the request for appointment (with accompanying documentation) to the Division office with a recommendation for approval. If the request meets Division requirements, the Division Director will ask the Dean of the Laney Graduate School to appoint the candidate as a member of the graduate faculty in the Division of Biological and Biomedical Sciences, affiliated with the Program that has submitted the request.
